Professional Carbon Reporting made simple!

RACE TO ZERO

Net Zero is, increasingly, a priority for businesses. Knowing where and how to start, creating & implementing credible plans and communicating progress to stakeholders is critical.

This why we've created 'Carbon Triple A'. Allowing any company to commit to Net Zero, create professional emissions reporting to an independent accreditation standard. Supported by an expert partners!

Professional Carbon Accounting software from CBN Expert allows you to measure, track & Report your carbon emission easily

The future Net Zero Standard, independently accredits your progress to national & international standards

A network of expert partners provide full support from the start, right to the end of your Net Zero journey

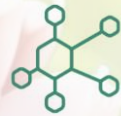

Presented by

Network Net Zero is one of the official partners of the United Nations Race to Zero initiative. We support companies pledging to net zero and, through Carbon Triple A we support them through the stages needed to comply with the Race to Zero – Plan, Progress & Publish

1. Pledge

Pledge to be Net Zero by 2050

**NETWORK
NET ZERO**

By joining the network you make your pledge to be a 'Net Zero' company by 2050. You're in 'The Race'

2. Plan

Develop a short /medium term plan

Simply choose one of the target levels to set your initial target. Targets range from 10% to 50% reduction from your benchmark

3. Progress

Take immediate action

Use the usage data and intensity metrics in the CBN Expert dashboard and the CBN Hub community to take immediate actions

4. Publish

Publish progress regularly

Upload your data and publish your CBN Expert Dashboard monthly. We'll also produce an annual report for the network communicating progress across all members

It's critical for companies targeting Net Zero to ensure that their plans and actions are correct and are properly addressing the mitigation of their emissions. The future Net Zero Standard has been created to provide an annual, independent accreditation for users to ensure that their reporting is correct and aligned to national & international standards. The future Net Zero Standard is used to support the annual 'Publish' requirements of companies pledged to Race to Zero
